## Take Advantage of Atwood Supply Chain Services.

### Always have the right tool. At the right price.

Atwood has strong relationships with leading manufacturers of the highest quality cutting tools and abrasives available. Because of our purchasing agreements and volume of business, we can offer you pricing that isn't available to small volume purchasers.

### Always have access to the latest tool technology.

Many of the tools your using today may be obsolete. Atwood tool engineers will always keep you aware of the latest in tool innovations, and will recommend the tool that will allow your equipment to operate at optimum efficiency to improved production.

### Always have unmatched technical support.

Production problem? We're there. To stay competitive today, you need quick answers to keep you operating at optimum efficiency. Atwood tooling engineers have years of first hand manufacturing experience. They will be available for you on site to help solve your production problems.

## Atwood Advanced Integration lets you be more productive and cut operating costs.

### Supplier Consolidation pays big dividends.

Using Atwood as your one-source supplier will keep your operating costs in check by cutting purchasing time, extra paperwork and processing costs.

### Ordering is easier.

No more wasting time calling multiple suppliers. You can be confident, Atwood will always have what you need. Delivered when you need it. Always at a competitive price.

Order products directly 24/7 through the Atwood website. Obtain product specs with links to over 100 manufacturers, and e-mail us with questions.

[www.atwoodindustries.com](http://www.atwoodindustries.com)

### Simplified billing.

You can receive monthly billing for all your purchases, along with detailed reports.

Other advantages include: E-Commerce, EDI, Bar Code Purchasing and Receiving, A.E, Visa, M/C.

### Web-Based Vending.

100% accountability cuts tool consumption and inventory cost. Locates supplies at point of use, eliminating time consuming trips to the tool crib. Tracks costs to jobs, department, or accounts. Helps control inventory and lowers cost of material management.

### Web-Based Barcode Tool Crib Inventory Control.

Atwood software helps manage your tool crib. It solves inventory inefficiencies – too many unnecessary parts, lack of organization, poor accountability, employee accessibility, no standardization of parts.

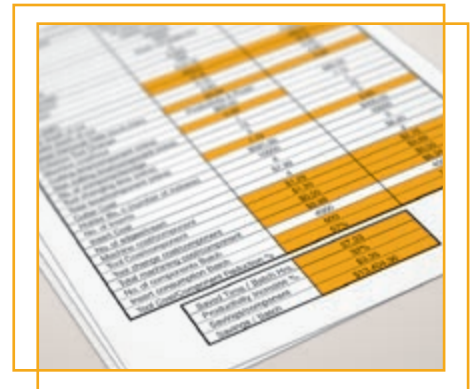

### Atwood Inventory Management Programs:

- "WebVend" & "Tool Boss" Vending Machines
- "Cribware" Tool Crib Software
- Local Customized Inventory
- Barcode Technology
- Blanket Orders/J.I.T.
- Parts Substitution/Standardization
- Obsolete/Overstock Elimination
- Accountability

### Documented Savings.

Atwood advanced tooling technology, production improvement solutions, and streamlined purchasing and inventory control can reduce costs significantly in all areas of your operation. We can also provide documentation for our key customers. And, as part of your continuous improvement program we will always look for innovative ways for you to operate more profitably.
